

Knome Enterprise Knowledge Management Platform

Role-Based User Manual

Target Audience: All Knome Platform Users (Employees, Community Admins, HR Admins, System Admins)

Enterprise: MPOnline Limited

Document Version: 1.0.0

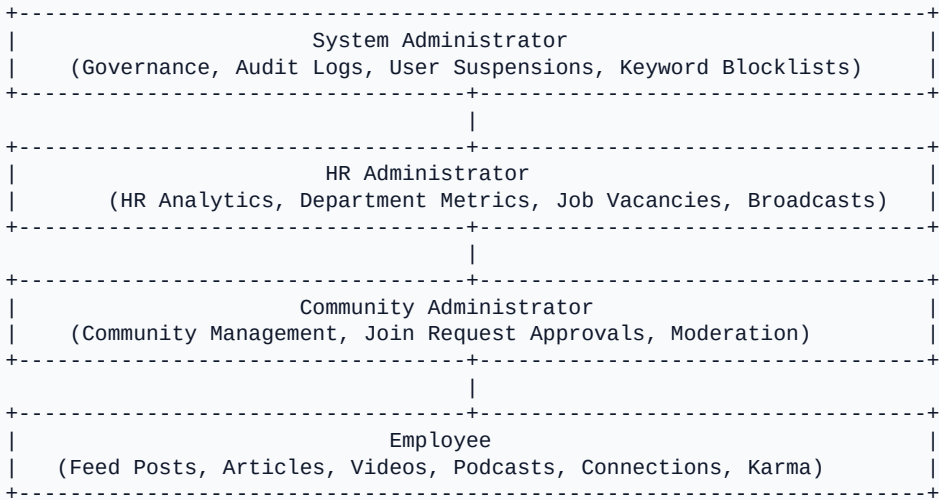

Language: English

Table of Contents

- 1. [Overview & Role Hierarchy](#1-overview--role-hierarchy)
- 2. [Employee User Manual](#2-employee-user-manual)
- 3. [Community Administrator User Manual](#3-community-administrator-user-manual)
- 4. [HR Administrator User Manual](#4-hr-administrator-user-manual)
- 5. [System Administrator User Manual](#5-system-administrator-user-manual)
- 6. [Quick Troubleshooting & Support](#6-quick-troubleshooting--support)

1. Overview & Role Hierarchy

The **Knome** platform is built on Role-Based Access Control (RBAC). A user's assigned role determines their permissions, navigation options, dashboard widgets, and administrative controls across the platform.

2. Employee User Manual

The **Employee** role is the primary self-service account for all staff members of MPOnline Limited.

2.1 Getting Started & Authentication

1. **Accessing Knome:** Navigate to `http://localhost:5173/login` (or production web URL).
2. **Logging In:** Enter your Employee ID (e.g., EMP001) and your password.
3. **Session Persistence:** Upon successful authentication, a JWT Bearer token is saved securely in your browser session.

2.2 Navigation & Main Dashboard

- **Home Dashboard** (`/dashboard`): Displays your personal feed, upcoming events, quick stats, karma point balance, and colleague recommendations ("People You May Know").
- **Top Navigation Bar** (Navbar):
- **Global Search:** Type keywords to search across employees, posts, articles, videos, podcasts, and communities.
- **Audio Player Shortcut:** Quick access to active background audio playback.
- **Notification Bell:** Click to view real-time notifications for likes, comments, connection requests, and system alerts.
- **Profile Menu:** Access your profile, saved bookmarks, notification settings, or log out.

2.3 Social Feed & Short Posts (`/posts``)

- **Creating a Post:**
 1. Click **"Create Post"** or the top status bar on the feed.
 2. Type your update text. You may include hashtags (e.g., #MPOnline #ProjectUpdate).
 3. Attach images or media files using the attachment button.
 4. Select visibility (Public to all employees, or targeted to a specific Community).
 5. Click **Publish Post**.
- **Interacting with Posts:**
- **Reactions:** Click the Like/Clap button to appreciate a post.
- **Comments:** Click Comment to open the inline thread and type nested replies.
- **Bookmark:** Click the Bookmark icon to save the post into your custom categories.
- **Share:** Share the post via internal link or direct message.

2.4 Articles & Long-Form Publishing (`/articles``)

- **Reading Articles:** Browse featured long-form technical write-ups, filter by category (e.g., Engineering, HR, Leadership), and view estimated reading times.
- **Publishing an Article:**
 1. Click **"Write Article"** button on the Articles page.
 2. Enter the Article Title, Subtitle, and select a Category.
 3. Write your content using full **Markdown** formatting support.
 4. Add tags (e.g., csharp, dotnet, react) and upload a cover header image.
 5. Save as a Draft or click **Publish Article**.

2.5 Video & Podcast Media Hubs (`/videos`` & `/podcasts``)

- **Watching Videos** (`/videos`): Browse technical demos, department presentations, and training streams. Click any video card to open the streaming video player modal.
- **Uploading Videos:** Click **"Upload Video"**, attach a video file, enter title/description, select category tags, and publish.
- **Listening to Podcasts** (`/podcasts`): Browse audio series and episodes. Click **Play** on any episode to initialize the continuous **Global Audio Player** at the bottom of the page, allowing you to listen uninterrupted while navigating to other pages.

2.6 Networking & Connections (`/network``)

- **Connecting with Colleagues:**

- View pending connection requests sent to you and click **Accept** or **Decline**.
- Browse "**People You May Know**" recommendations and click **Connect**.
- **Following Colleagues**: Click **Follow** on any employee profile to receive their published articles and updates in your feed without formal connection.

2.7 Employee Communities (`/communities`)

- **Discovering Communities**: Browse public interest or department communities.
- **Joining Communities**: Click **Join** for public groups, or **Request to Join** for private/invite-only communities.
- **Participating**: Access dedicated community feed channels, post updates, and view community members.

2.8 Karma Points & Gamification (`/karma-history`)

- **Earning Karma**: Earn points automatically by creating posts (+10 pts), publishing articles (+25 pts), receiving likes (+2 pts), and maintaining daily streak activity.
- **Tracking Points**: View total accumulated Karma, view your transaction history, and check your rank on the monthly employee leaderboard.

2.9 Job Board & Internal Careers (`/jobs`)

- **Browsing Vacancies**: Explore internal job openings posted by HR across departments.
- **Applying**: Click on a job posting to view requirements, click **Apply Now**, and submit your internal profile application.

3. Community Administrator User Manual

The **Community Administrator** role possesses full administrative control over specific employee communities.

3.1 Community Setup & Configuration

1. **Launching a Community**:
 - Navigate to `/communities` and click "**Create Community**".
 - Enter Community Name, Description, Cover Banner, and set Privacy Type:
 - **Public**: Any employee can join immediately.
 - **Private**: Requires Community Admin approval to join.
2. **Configuring Rules**: Define community guidelines and topic scopes.

3.2 Member Management & Approvals

- **Reviewing Join Requests**:
 - Open your Community View page (`/community/:id`).
 - Click the "**Pending Requests**" tab.
 - Review employee profiles requesting access and click **Approve** or **Reject**.
- **Managing Member Roles**:
 - View the Member Roster.
 - Promote active members to **Moderator** or **Co-Admin**.
 - Remove members who violate community guidelines.

3.3 Content Moderation & Curation

- **Pinning Announcements**: Pin important community posts or guidelines to the top of the community feed.

- **Deleting Off-Topic Posts:** Remove inappropriate or off-topic posts submitted to the community channel.
-

4. HR Administrator User Manual

The **HR Administrator** role manages organization-wide communication, internal mobility, and employee engagement metrics.

4.1 HR Analytics Dashboard (`/hr-analytics`)

- **Accessing Analytics:** Navigate to `/hr-analytics` via the main sidebar.
- **Department Participation:** View charts depicting employee engagement rates across all MPOnline departments.
- **Top Creators & Content Consumption:** Identify top article publishers, popular videos, and overall content consumption statistics.
- **Exporting Reports:** Export monthly engagement metrics for executive reviews.

4.2 Internal Job Vacancy Portal (`/jobs`)

- **Posting a Job Opening:**
 1. Navigate to `/jobs` and click "Create Job Posting".
 2. Enter Job Title, Department, Work Location, Role Description, and Key Requirements.
 3. Set Application Deadline date.
 4. Click **Publish Vacancy**.
- **Managing Applications:**
 - Click on an active job posting to view internal applicants.
 - Review employee applicant profiles, skills, and current department details.
- **Closing Job Vacancies:** Click **Close Posting** when a position is filled or expired. (The backend `JobExpiryHostedService` also automatically archives expired listings).

4.3 HR Announcements & Broadcasts

- **Broadcast Alerts:** Publish company-wide announcements that display prominently at the top of all employee dashboards and send instant push notifications via SignalR.
-

5. System Administrator User Manual

The **System Administrator** role holds ultimate authority for security, audit logging, content moderation, user account status, and system governance.

5.1 Admin Console (`/admin-console`)

Navigate to `/admin-console` from the user profile dropdown or sidebar.

5.2 Audit Logs & Security Inspection

- **Viewing Audit Logs:** Inspect immutable system logs recording key security events (Logins, Failed Auth Attempts, Role Changes, Content Deletions, Account Suspensions).
- **Filtering Logs:** Filter by Date Range, Employee ID, Event Type, or IP Address.

5.3 Moderation Queue & Flagged Content

- **Reviewing Reports:** Access the **Content Moderation Queue** to inspect posts, articles, or comments flagged by users.

- **Moderation Actions:**
- **Dismiss Report:** Mark the report as invalid.
- **Delete Content:** Purge violating posts/comments from the database.
- **Issue Warning:** Send a formal warning notification to the content creator.

5.4 User Account Governance & Suspensions

- **Managing User Accounts:** Search for any employee account in the Admin Console.
- **Suspending an Account:**
 1. Select the user account and click **Suspend Account**.
 2. Provide a mandatory reason for suspension.
 3. The SuspensionGuard backend service immediately blocks the user's JWT token from making any API calls.
- **Restoring Accounts:** Click **Reinstate Account** to clear suspension flags and restore platform access.

5.5 Keyword Blocklists & URL Security

- **Restricted Words:** Maintain a list of restricted keywords automatically flagged or blocked by client-side and server-side filters.
- **Blocked URLs:** Configure malicious or forbidden external domain links to prevent employees from posting unsafe web URLs.

6. Quick Troubleshooting & Support

Issue	Cause	Solution
Login Failed	Incorrect Employee ID or Password	Verify credentials (default test: EMP001 / Password@123). Contact System Admin to reset password.
"Account Suspended" Alert	User account flagged for policy violation	Contact your System Administrator for audit review.
Audio Stops When Changing Pages	Audio played outside Global Audio Context	Ensure playback is triggered through the continuous GlobalAudioPlayer.
Private Community Content Not Visible	Membership pending approval	Check with the Community Admin to approve your pending join request.
Unable to Post Job	Insufficient Role Privileges	Job creation requires HR Administrator or System Administrator role.

Manual prepared for MPOnline Limited Knome Knowledge Management Platform.
